

REGENERATED CARDED

In a historical moment in which the major international brands have focused on sustainability, Texmoda makes use of regenerated wools and cotton, as well as polyamide and polyester, to lower the environmental impact on its productions. The recycle and reuse of fibers already treated allows to limit the workmanships and the use of chemical products and the waste of water, saving energy and subtracting every year 22 tons of materials to the cycle of disposal of the refusals.

A calculation, necessarily approximate, on the base of these 20.000 compared with the equivalent of virgin fiber, hands to esteem a saving of:

- 60 million kilowatt of energy
- 500.000 waters meter cubes
- 650 tons of chemical auxiliaries
- 300 tons of colorants.

Moreover we avoid the input in the atmosphere of :

- 18.000 tons of carbonic anhydride
- 1.000 tons of sulphurous anhydride

TEXMODA

TEXMODA TESSUTI COMPANY PROFILE

The company has been established more than 40 years ago and became a production leader of fancy fabrics since the very beginning. Texmoda Tessuti has been able to extend its business relationships with the most important and famous brands throughout the world. In fact, we are nowadays well known in both national and international markets. The production is entirely Made in Italy, using only first quality raw materials and selected third party companies. The key words of our strength are: Flexibility, Quickness, Punctuality and Quality. We create new qualities and designs everyday thanks to technical skills and know-how giving life to fashion and trendy collections.

Texmoda Tessuti takes also part to the major textile fairs throughout the world, showing innovative and fashionable collections born from our capacity of interpreting the latest trends every season.

SUSTAINABILITY IN TEXMODA TESSUTI

For a long time a very sensitive firm to the environmental themes, Texmoda pursues the objectives of sustainability acting on multiples fields to reach the goal of an eco-sustainable fashion through a virtuous supply chain and a constant attention in the whole productive cycle.

DETOX GREENPEACE

Texmoda Tessuti recognizes the importance of eliminating dangerous substances from the production cycle, for this reason, in March 2016, we signed the Detox commitment, promoted by Greenpeace, thus initiating an important path of improvement. We have committed ourselves to eliminating 8 groups of dangerous chemicals from our industrial processes, leading to the ambitious goal of eliminating 11 groups of harmful substances in 2020.

GRS CERTIFICATION

Texmoda Tessuti has obtained the GRS certification regarding the traceability of the regenerated products that it produces, recognition of a virtuous process and constant attention to the regenerated materials used, to offer a certified and transparent product.

The GRS criteria concern the following areas:

- Product composition and content of recycled materials
- Maintaining traceability throughout the entire production process
- Restrictions on the use of chemicals.

Compliance with relevant environmental criteria that may concern: water supply, wastewater discharge, and water discharges; energy recovery (use of selected waste); pollutant emissions into the atmosphere; waste production and management; contamination of soil and groundwater, management of dangerous substances, preparations and materials; sound emissions; emergency management compliance with social criteria relating to workers rights.

B.C.I. – GOTS – FSC YARN

Texmoda makes use of yarn's suppliers certified with FSC for viscose and BCI for cotton as well as GOTS for organic fibers. The FSC certification ensures that products come from responsibly managed forests that provide environmental, social and economic benefits.

The BCI provide training on more sustainable farming practices to more than two million cotton farmers that now produce the most sustainable cotton.

The GOTS certification is the worldwide leading textile processing standard for organic fibers, including ecological and social criteria of the entire textile supply chain.

ECOVERO – CANOPY VISCOSE

The viscose in our fabrics can be sourced by suppliers certified with Ecovero Lenzing and in compliance with the Canopy standards

POLY FROM PET OR FISHNET

We can source also yarns containing Polyamide and Polyester coming from Pet or fishnet recycling. .

ECO-FRIENDLY FINISHING

Texmoda Tessuti makes use of selected third part suppliers sensitives to environmental issues, especially our finishing process is completed eco-friendly, and highly concerned about water wastes and discharges and using products chemicals hazardous free as well as acting on energy saving with Led lighting system, and textile machinery with inverters controlled engines. Mostly, the whole finishing plant is working with a water saving and water recycling system.

COMPLIANCE ZDHC

Our fabrics are in compliance with the ZDHC MRSL standard for chemical safety
